

Reducing the Flood Risk

Skill Level

Basic

Course Description

In any given year, flood causes an estimated financial loss of US\$2 billion to US\$3 billion worldwide, making flood the most costly natural hazard in the world. But, while the majority of flooding is inevitable, the majority of flood-related property loss is preventable. Reducing the Flood Risk is a free, interactive tutorial available exclusively to FM Global clients that identifies the steps needed to reduce the likelihood of a major flood loss. The course takes less than one hour to complete.

Target Audience

- Plant managers
- Personnel responsible for reducing the likelihood of a major flood loss

Upon completion of this course, you should be able to understand:

- How to reduce the likelihood of a major flood loss
- Mitigation measures to avoid and limit flood damage at your facility
- Methods to evaluate the degree of risk at your site
- Planning strategies to limit your exposure to flood damage in new and existing facilities
- Steps to prevent floodwater from entering key areas at your facility
- How to keep valuable assets in your facility high and dry
