

Advances In FM Global Fire Protection Standards Online Series

Skill Level

Basic

Course Description

Due to recent advances in sprinkler technology, this online series informs the course participant of important changes to FM Global's fire protection standards. It comprises six short training modules and includes an overview video featuring FM Global Chairman and CEO Shivan Subramaniam. The modules include: *Evolution of FM Global Fire Protection Standards*, *Terminology Change to Categorize Sprinklers*, *Movement Away from Density*, *Why New Data Sheet 2-0 Installation Standard?*, *Data Sheet 8-9 Revision and Changes in Protection Tables*, and *Retroactivity for Existing Locations*. Viewing time for the entire series is approximately 20 minutes.

Target Audience

- FM Global policyholders, brokers and other strategic partners
- Sprinkler contractors
- Authorities having jurisdiction (AHJs)

Upon completion of this online course, you should be able to:

- Identify changes in new and revised data sheets
- Recognize changes in terminology
- Explain why FM Global standards may vary from other standards, including local standards
- Use FM Global Property Loss Prevention Data Sheets 2-0 and 8-9 to determine how sprinkler systems need to be designed and installed to meet FM Global standards
